Learning Styles Survey

Suggested timeframe of completion: Beginning of School Year- October 1

STEP 1

Knowing how you learn and process new information is a great advantage for your education. Being aware of your dominant learning style can help you focus on finding the tools you'll need to learn the material you are being asked to master. For instance, if you're having difficulty understanding the directions in your math textbook (and you are a visual or verbal learner), you may want to look for an online tutoring video to help you work through the challenge.

Take the Learning Style Survey

STEP 2

What is your general learning style?

☐ **Learn by Reading**

☐ **Learn by Hearing**

☐ **Learn by Doing**

What is your math learning style?

☐ **Learn Math by Seeing Problems**

☐ **Learn Math by Talking It Through**

What is your social learning style?

☐ **Learn With Others**

☐ **Learn By Myself**

What are three learning strategies for your unique learning styles?

Example: Take notes. Make lists. Rewrite your notes.
